Beast Simulator Battle is a physics based battle simulator featuring a variety of animals. Pit dinosaurs with machine guns against a hundred giraffes, complete over 30 challenges or relax with a game of beast football. Fantasy fight
Beast Battle Simulator is a sandbox style game where the player creates their own fun with ridiculous simulations. The main game mode involves building two opposing teams of animals, equipping them with weapons or superpowers and then letting the carnage begin. Battles are based on fairly realistic attacks and movements, with each creature having their own stats and abilities. In addition to this mode, Beast Battle Simulator also has a football option where player-created teams face and a number of challenges. These task the player with fighting big bosses or waves of smaller warriors. While the fun of creating epic and silly battles and the extra modes in the first place is interesting, a lack of depth, creation modes and more leads to the game losing player information quite quickly. Since the game is still in early access, however, more content has been promised. Silly sandbox
Beast Battle Simulator is a crazy sandbox that answers the age-old question of who would emerge victorious between a hundred pigs and a T-Rex. However, the bare bones nature of the current condition makes it a pretty risky purchase. Large number of beasts
Extra challenges
Early access
Small amount of content
